

9b. Complete the calculations below.

$$6 \times 8 \times 4 = \square$$

$$12 \times 10 \times 7 = \square$$

$$3 \times 7 \times 6 = \square$$

9b. Complete the calculations below.

$$2 \times 7 \times 9 = \square$$

$$9 \times 11 \times 2 = \square$$

$$3 \times 12 \times 4 = \square$$

9b. Complete the calculations below.

$$11 \times 6 \times 4 = \square$$

$$10 \times 9 \times 11 = \square$$

$$4 \times 7 \times 8 = \square$$

Make the target number of 84 using three of the digits below.

$$\square \times \square \times \square = 140$$

Multiply the remaining three digits together, what is the product of the three numbers?

Is the product smaller or larger than 140?

Make the target number of 120 using three of the digits below.

$$\square \times \square \times \square = 120$$

Multiply the remaining three digits together, what is the product of the three numbers?

Is the product smaller or larger than 120?

Make the target number of 126 using three of the digits below.

$$\square \times \square \times \square = 126$$

Multiply the remaining three digits together, what is the product of the three numbers?

Is the product smaller or larger than 126?

Make the target number of 84 using three of the digits below.

$$\square \times \square \times \square = 72$$

Multiply the remaining three digits together, what is the product of the three numbers?

Is the product smaller or larger than 72?
