Fluency

LO: To subtract two 3 digit numbers using columnar subtraction.

Success Steps:

1. Write the subtrahend under the minuend, in the correct columns.
2. Start with the ones column and subtract the subtrahend from the minuend.
3. Continue with the tens and hundreds columns.
4. The difference is less than the minuend.

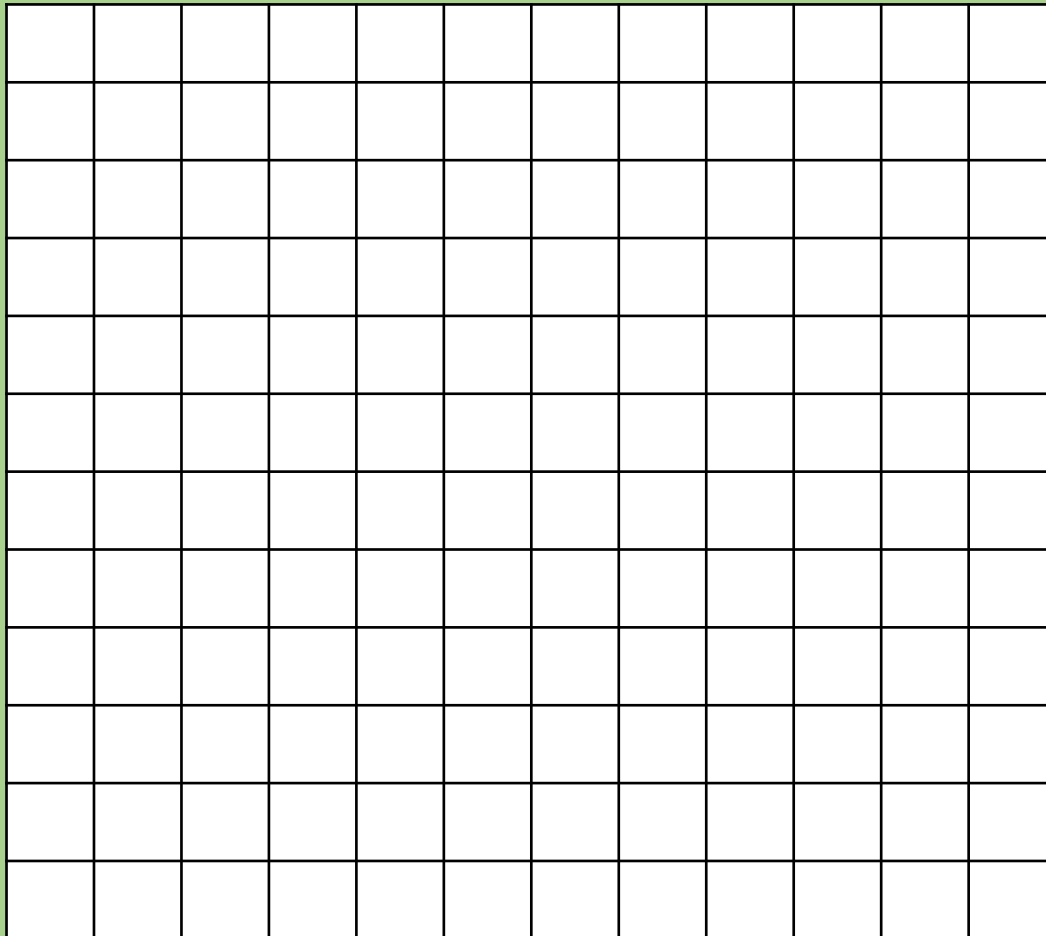

JOB DONE

Fluency

Think Aloud

$$534 - 222 =$$

Success Steps:

1. Write the subtrahend under the minuend, in the correct columns.
2. Start with the ones column and subtract the subtrahend from the minuend.
3. Continue with the tens and hundreds columns.
4. The difference is less than the minuend.

Fluency

Think Aloud

$$786 - 141 =$$

Success Steps:

1. Write the subtrahend under the minuend, in the correct columns.
2. Start with the ones column and subtract the subtrahend from the minuend.
3. Continue with the tens and hundreds columns.
4. The difference is less than the minuend.
